

Renewable energies kit with one three-blade propeller, consumer unit and multimeter.

EQ387B

Knowledge areas

Physics - Metrology

Key Experiments

The power, the electric frequency and the speed of rotation of the aerogenerator

Some factors that influence the performance of a photovoltaic panel

The analysis of the performance of a photovoltaic solar panel

The advantages of the use of the energy accumulator in a charged solar panel circuit

Measuring the variation of ddp over the electricity accumulator associated with the solar panel

The curve typical of the photovoltaic solar panel and its efficiency
