

Ballistic Pendulum, digital multi-chronometer.

EQ166A

Função

Intended for experimental study, physics laboratory and conducting physics experiments about: movement in two dimensions, projectile movement, projectile launch, oblique movement, range and its uncertainty, launch speed, conservation of mechanical energy, kinetic energy, energy gravitational potential, amount of linear motion, amount of angular motion, ballistic pendulum, inelastic collision, oscillation period, etc.

Áreas de Conhecimento

Physics

Nível de Ensino

Graduation - Technical education
